Benefits:

◆ **Expanded Product Offering Provides More Revenue and Greater Profit Opportunities**
Fresh on the heels of 2007's successful launch of toner cartridges for use in OKI C5100-series machines, Katun customers now have another quality alternative to high-cost OEM supplies for a wide range of popular OKI color digital printers and MFPs. For the first time, dealers, distributors, and office supply retailers can confidently offer their customers a means to reduce their printing / copying costs in these OKI applications without sacrificing quality.

◆ **Expense Reduction - When You Need It Most!**
Let's face it, in today's economic environment, what business, school district, government organization or financial institution isn't looking for ways to cut expenses?

◆ **Toner Performance You Can Trust**
These new Katun Performance toners have been developed and rigorously tested to provide oustanding color reproduction, image quality, image density, and page yields and to ensure complete compatibility with the OEM toner. Katun's testing and evaluation protocols ensure industry-leading performance – giving you a reliable, profitable OEM alternative.

◆ **Highest in Remanufactured Quality**
These remanufactured toner cartridges fit, install, and perform the same as the OEM cartridges, and contain a compatible chip designed specifically for the designated model application; this helps make the transition from OEM toner to Katun Performance toner seamless for the consumer. All remanufactured Katun Performance products are developed and remanufactured according to ASTM, STMC and ISO quality guidelines.
