

Looking for Laser Printer Supplies that Provide Outstanding Value and High Product Quality?

Katun, Your Trusted Source of High-Quality Copier Products, Now Offers a Growing Selection of Laser Printer Products!

For more than a quarter century, office equipment dealers around the world have depended on Katun for high quality, high value products for their analog copiers and digital copier/printers.

As the copier and printer markets continue to converge, Katun is responding to customer needs for laser printer supplies that provide the optimal levels of quality and value that you've come to expect from Katun. As the world's leading alternative provider of copier supplies and parts, **we intend to be the solution to all of your supplies needs, including printers.**

Katun Performance™ laser printer products will allow you to more profitably service your current customers, while also enabling you to generate new sources of revenue!

✓ Tremendous Product Range

Katun now offers a broad line of high-quality toner cartridges for your newest and most popular OEM printer models – as well as less widely available products for niche printer and multi-function applications. This includes a broad range of monochrome toner cartridges, as well as a strong line of high-performance color toner cartridges.

✓ Quality and Performance

Katun Performance toner cartridges meet or exceed end-user expectations for remanufactured products. These cartridges are manufactured to the highest standards possible – utilizing new components when possible to achieve optimal product performance.

In addition to the broad selection of remanufactured products, Katun offers a limited number of new-built cartridges that also offer outstanding value. They are developed and extensively tested to ensure OEM comparable print quality: image density (graphics and text), yields, background levels, and – where applicable – color reproduction.

✓ Excellent Cost Savings

Katun Performance laser printer products are competitively priced against other aftermarket compatible products, while offering significant cost savings versus OEM products. This not only translates to significant cost savings for your customers, but also potentially greater profits for you!

✓ **Environmentally Friendly Remanufacturing Process Ensures High Quality**

By using Katun Performance remanufactured toner cartridges, and by participating in our cartridge recycling programs, you help reduce the number of cartridges that end up in landfills. Using remanufactured toner cartridges makes sense financially – and environmentally.

Katun also uses appropriate drum/toner combinations to ensure optimal print quality, achieve maximum efficiency, and minimize waste. These toner cartridges are remanufactured under a thorough process - where each cartridge is fully disassembled, cleaned and inspected for worn or damaged parts. Re-assembly involves precisely matching every component of the cartridge to produce the highest quality possible. In addition, Katun Performance toner cartridges are post-tested so end-users receive excellent quality, time after time.

✓ **Customize Product Packaging with Katun's Personalized Product Program**

Reinforce the strength of your company name with Katun's Personalized Product program. Customers will see your name and phone number every time they replace their toner cartridges; it's the simplest, most reliable way to remind them to call you – not your competition – when they need additional toner cartridges.

✓ **Comprehensive Warranty**

Each Katun Performance brand printer and fax supply product is warranted to be free from defects in material and workmanship for two years from date of purchase. In addition, in the event that a Katun Performance product has been the direct and sole cause of damage to the components of a printer or facsimile machine, Katun will pay all or a portion of the repair costs. See the Katun Performance Printer and Fax Supplies Warranty for details.

✓ **"One-Stop-Shopping" Across Copier and Printer Lines**

Katun has long offered the broadest selection of copier supplies and parts; now you can depend on Katun to be an excellent option for fulfilling your needs for high-quality, cost-effective printer supplies as well.

Your Best Overall Value

At Katun, we're more than the world's leading alternative supplier for copier parts and supplies. Our growing product selection of supplies and parts for printers and multi-function devices provides you with:
